

Dear Hiring Team and The New York Times,

I am excited to apply for the iOS Engineer Internship. As a sophomore studying Computer Science at Loyola University Chicago, with a minor in Statistics, I am eager to integrate my strong academic background into your innovative projects.

My journey so far has been marked by significant research experience, sponsored by prestigious institutions such as the National Science Foundation (NSF) and Argonne National Laboratory. This involvement has not only sharpened my technical skills but also affirmed my commitment to contributing to groundbreaking work in technology.

With vast experience in Swift application development for Apple devices, I bring a solid foundation in both theoretical and practical aspects of software engineering. The challenges I have tackled in my research have equipped me with the resilience and skillset necessary to excel in a fast-paced, innovative environment like The New York Times.

My research and academic curriculum have enhanced my data structures skills and familiarity with server-size architecture, which complement my advanced skills in Swift—the language that is at the heart of iOS app development. I am adept at working under pressure, consistently meeting deadlines, and I excel in collaborative settings, often assuming leadership roles in group projects and research teams.

The experience gained from working with NSF and Argonne National Laboratory has instilled in me a professional rigor and a deep understanding of how cutting-edge technology can be leveraged to solve complex problems. I am confident that this background, combined with my passion and dedication, will make me a valuable asset to your team.

Thank you for considering my application. I am enthusiastic about the possibility of contributing to The New York Times, and I am looking forward to the opportunity to discuss how my extensive research experience and skills would be beneficial for the role. Please do not hesitate to contact me at mjuarez4@luc.edu for any further information or to set up an interview.

Warm Regards,

Maddie Juarez
